

SHARPSHOOTING and CAPTURE/EUTHANIZE

The following is an eyewitness account.

SHARPSHOOTING:

We saw them shoot and miss. When the bullets didn't do their job they put plastic bags over the heads of living, thrashing deer to suffocate them. Some deer were even dragged off by their legs while still shaking in the throes of a slow, painful death.

CAPTURE/EUTHANIZE

The rocket nets' steel spikes kept missing their targets and connected in the eyes, ears, etc of the deer as they thrashed about in pain. The procedure ended when a bolt was fired into their brain.
